California State University, Sacramento
2020

A.S., Computer Science
Folsom Lake College
2017

PROFILE

Product designer with ~5 years designing complex, workflow-critical enterprise software end-to-end — research through validated delivery. Sole or lead designer on **six internal products at LinkedIn** across Talent Acquisition, People-tech, Finance, and Marketing. Strong in research, information architecture, interaction design, and emerging AI-assisted UX patterns. Known for a fast co-design method that turns stakeholders into collaborators and ships designs with alignment already baked in.

EXPERIENCE

LinkedIn — Oct 2021 – Present

Senior Product Designer
Full-time · Apr 2025 – Present · Remote

- **Talent Development & Evaluation (People-tech)** — Sole designer on LinkedIn's performance-review and calibration system — usability revamp, 0→1 calibration, and AI-assisted drafting. Projected to cut calibration-session time **80%** with 100% developmental-feedback coverage. Ran a 4-day HR co-design intensive — cited by leadership as an internal best practice — plus 8 manager usability sessions and 6 HRBP interviews. Adopted beyond Engineering into the Product and Global Talent orgs.
- **Email Validation Agent (Finance)** — Sole designer of an AI-assisted validation system protecting ~1.1M invoice emails from data-leak incidents at LinkedIn Receivables. Delivered the MVP in 6 weeks as the first designer embedded with the finance-engineering team.
- **Recruit Portal 2.0 (Talent Acquisition)** — Returned to lead the AI re-imagining of interview scheduling; defined a three-tier AI interaction framework (activity / suggestion / assistant) and ran a week-long stakeholder intensive to set direction before design.

Product Designer
Full-time · Apr 2022 – Apr 2025 · San Francisco, CA

- **Recruit Portal (Talent Acquisition)** — Sole designer building and shipping the end-to-end hiring system now used daily across Engineering R&D — a search-and-filter redesign (card sort → 7 validated filters), a new homepage IA validated by A/B test and usability testing, and a full scheduling-and-evaluation flow spanning **10 defined personas**. Demoed to the VP of Engineering Recruiting and SteerCo.
- **Template Management System (HR Ops)** — Lead designer (with one teammate) consolidating three separate HR letter tools into one self-service platform — 4 personas, 3 UAT rounds, 12+ research-driven design changes.
- Also led **0→1 LinkedIn Brand Insights** (Premium brand analytics) and a **Campaign Central** redesign (marketing technology).

Product Designer
Contract · Oct 2021 – Apr 2022 · Sunnyvale, CA

- **Recruit Portal (Talent Acquisition)** — Embedded as sole designer: three months of contextual inquiry across every persona in the hiring workflow, plus a competitive evaluation of two legacy ATSs. The research reframed a planned tool enhancement into a full two-ATS consolidation — the direction the product followed for the next three years.

UX Consultant · InstaMed, a J.P. Morgan Company — Mar – Aug 2021

Internship · UC Irvine MHCID capstone

User research and usability testing for a redesign of InstaMed Online for Providers; user flows, wireframes, and prototypes with developers.

UX Consultant · ZamQuests — Oct 2019 – Jul 2020

Freelance · Sacramento, CA

Revamped the ZamQuests website and mobile app: stakeholder and user research, low- to high-fidelity prototyping in Adobe XD, interface and visual design.

UX Consultant · CHEERS, California Energy Registry — Jun – Aug 2019

Internship · Sacramento, CA

Customer interviews to diagnose pain points and surface new product opportunities; user flows, wireframes, and prototypes for new features.
